

Viththiyakaran Nadarajah

Software Developer and IT Support Professional

Newtown, Powys, Wales | hello@viththiyakaran.co.uk | github.com/Viththiyakaran

CORE SKILLS

C# and .NET

React and TypeScript

SQL and relational data

Application and technical support

Troubleshooting and root-cause thinking

AWS cloud foundations

LOCATION

Based in Newtown, Powys.
Available for Wales-based, hybrid and suitable UK remote opportunities.

WORK STATUS

Right to work in the UK. No sponsorship required.

TARGET ROLES

Software development

Application support

IT and technical support

Systems support

Junior cloud roles

PROFESSIONAL PROFILE

Software developer and IT professional combining previous software engineering and technical support experience with current UK operational and supervisory responsibility. I build practical .NET and React solutions, investigate business-system issues and approach software around real users, supportability, accessibility and clear operational requirements.

EXPERIENCE

UK operational and supervisory experience

Current

- Leadership, responsibility, compliance awareness and customer service.
- Day-to-day problem solving, team coordination and clear operational handovers.
- Practical understanding of business processes and the impact of reliable systems.

Technical support experience

Previous experience - employer and dates to be added when verified

- Structured investigation, user communication and practical issue resolution.
- Support-minded approach to errors, diagnostics, documentation and recovery.

Software engineering experience

Previous experience - employer and dates to be added when verified

- Foundation in application development and maintainable software design.
- Portfolio work covers C#, .NET, React, TypeScript, SQL, security and accessibility.

EDUCATION

MSc IT studies - UWE Bristol

Completion status, dates and modules to be added when verified.

B.Tech in Software Technology

Institution, dates and classification to be added when verified.

SELECTED PROJECT EVIDENCE

QR Facility Access Management System - Architecture case study exploring opaque QR tokens, role-based access, audit events and supportable .NET/React boundaries.

FuelOps Rota Planning - Concept for accessible weekly rota planning, validation, schedule state and maintainable business workflows.
